

# VILLA IN LOS MONASTERIOS

## Oasis of elegance

Valencia, España

In the heart of Los Monasterios, here I am, a majestic chalet that masterfully blends the essence of tradition, good taste, and quality, shaping an authentic home that today is a rare gem. First, let me share my little secret: I am so spacious that, should you choose to stay with me, you could expand and build whatever your imagination desires. With approximately 980m2 distributed on a 3000m2 plot, I am an oasis of elegance, unfolding with the main floor and three mezzanine levels.

## Magnificent interiors

I have 3 bedrooms and two bathrooms in the main area, where the marble floors welcome you into a unique living experience. Every corner, every detail, is a harmonious symphony of style and distinction. In addition, there is another floor with 3 more bedrooms and two bathrooms. In the main area of the house, two large skylights with remote control introduce a play of light and shadow, transforming each moment into a sensory experience. Each room, a private sanctuary, opens to terraces offering views of the surrounding nature. The oak wood carpentry, a silent witness to stories, is enriched with closets that are chapters of a well-lived life. My basement, a rustic area

with strategic access to the garden and the pool, is the perfect setting for family gatherings. Lined with the noble wood of 'iroko' and paved with terracotta floors, this area houses a kitchen that invites culinary creativity, two bathrooms, and a wine cellar with a hydraulic door that holds secrets and treasures. I also have a spacious garage with 5 parking spaces.

## A work of art

Culinary art finds its expression in a paella pan, a barbecue, and a Moorish oven, which are harmoniously integrated into the gardens surrounding the pool. I also have an independent 85m2 apartment, carefully designed to accommodate guests or staff. A space that holds a living/dining room filled with light, a kitchen that awakens the senses, two intimate bedrooms, and a bathroom that will warmly welcome its inhabitants. Finally, my garden marks a turning point, as it is home to magnolias, carob trees, a lemon tree, and palm trees—green guardians that greet you with their wind-sculpted leaves and escort the serenity of the Mediterranean garden. Each step in my garden is a journey through the seasons, an experience unfolding between the warmth of the sun and the cool shade, between the fragrance of flowers and the whisper of leaves. This is who I am—not just a home, but a masterpiece that awakens the senses, celebrates life, and pays tribute to beauty in every corner.
