

ROJA VILLA

A Majorcan gem

Mallorca, Islas Baleares

The Villa Roja follows the style of the typical houses of the Majorcan southeast, characterized by its rectangular shape and gabled roof. It has two heights and a basement that serves as a machine room and laundry. Likewise, there are various adjoining structures such as a large garage and a private pool.

Dreamy interior

On the first floor, a wing that is accessed through a large hall, there is a spacious and comfortable living room with a fireplace, and two large double bedrooms with en-suite bathrooms. Both rooms have large windows. The main room also has a small terrace with views of the pool and the grounds of the house.

All the details

Access to the house is through a stone tower that contains the staircase that connects the ground floor with the upper floor and the basement. The west wing of the ground floor has been conceived as a space whose large dimensions make it possible to create, through the furniture, several differentiated environments, also having a fireplace. From here you can access the kitchen and the adjoining pantry as well as the magnificent porches that surround the house.
