A unique home

This house is unique, its construction is timeless and it offers a contemporary style. Its façade is made of cara vista bricks and combines with other noble materials. The garden is colorful and full of tropical plants. The swimming pool is amazing. The house is divided into 3 floors plus the basement. On the ground floor we find an entrance hall, a spacious living room with several areas and large windows that make it very luminous. There is a fully equipped Italian design kitchen with access to the terrace and a bedroom and bathroom on this floor. Even a zen garden in the center since the construction is open so that the house is very comfortable and is connected from all rooms.

In & out relax

On the first floor are the main rooms with the suite with its terrace, a very large dressing room and a bright bathroom. On the other side there are two double bedrooms each with its own bathroom and access to a terrace. In the hall we even have a "laundry chute" so that the clothes arrive at the laundry quickly. The large basement is presented in the form of a second living room with a wine cellar and a game room and billiard, another Zen garden separates the rooms and leads us to the spa and gym where you can enjoy sports as well as relax in the indoor pool with views of the outdoor tropical garden.
